NEGLIGEE COSTUMES.

The Social Revolution Caused by the Unstarched Shirt.

IN FLANNEL OR CHEVIOT.

The Negligee Shirt Has Come to Stay-Comfort and Convenience - Shirt Sleeves No Longer Tabooed-Correct Summer Dress for Street and Office.

HOSE WHO have tried it ay that it is all a mistake o suppose that the ordinary shirt is more com- the American continent. The latter averfortable than a negligee ment, while not giving the primary cause, shirt. Some people may is the nearest to a correct conception of the be skeptical on this point, facts. Mere guessing is not sufficient to arrive but it is of no use. It has at a true conclusion in regard to this phenombeen decided that negliges ena—its magnitude, its combined forces and its effects. Labor, study and a constant obshirts are the things to wear, and as a result they are worn, this year perhaps more generally than ever before. At the present rate of progress in popular favor it seems to be only a question of time when no other kind of shirt will be worn. It was not long ago when men who observed the control of them, yet in

when men who observed their aggregate of completion they are as won-the strict proprieties of life refused to sanction derful in their magnitude as they are slow in a garment of this character except when in the woods or engaged in outdoor sports. Now, however, the negligee shirt is practically worn on all occasions, except at church and weddings. What is a still greater innovation is the fact that vests have been discarded with the introduction of the new-fangled shirts. This radical change in men's fashions, however, only applies to the hot-weather costume. For winter use the boiled shirt and the vest are climate are experienced, once enjoyed seasons still considered necessary, but it may be that as mild as our own. And we know also of a change will be effected in this direction and that the negligee shirt will be worn all the year around. Men have been inclosed in the period, fields of ice filled the valleys, leaving stiff-bosomed shirts for so many years that a a moraine to mark their passage to the sea and change is gladly welcomed. In the direction to record unerringly through the cons of time of ease and grace the flannel or cheviot or even silk shirt is a great advance. It gives color and variety to the male costume which it has lacked ever since the knee breeches, the frilled shirts and lace trimmed coats of our forefathers have been retired from active service. THE MODERN BUSINESS MAN

on a hot day wears a thin sack coat of some light material and a negligee shirt, and his trousers are belted around his waist. He can then rush around in the

bustle of business without the signs of demoralization which a limp collar and a disordered shirt front always betoken. Instead of yielding to what was supposed to be the demands of propriety and wearing a vest even if he sometimes let it go unbuttoned, he now boldly discards it altogether. When he is in his office he can diswore a white shirt it was considered vulgar to be seen "sitting in your shirt sleeves," as the

IN THE GOVERNMENT OFFICE it has long been a disputed question whether a male clerk had a right to do without his coat mark the northeastern track of storms. when lady clerks occupied decks in the same room. The men generally maintained that it was their right and privilege to make them- arctic circle; a more northward movement of

and as a result shirt
sleeves in the governthat this "northward movement" would ment departments, even eventually result in completely blockon the hottest days, ing with icebergs the entire arctic currents were seldom seen. The that cross the routes of transatlantic steamers. ladies had their own The meteorological conditions of the North way, as they usually do. American continent would be in a state of and the men sweltered while they envied the more or less disastrous to agriculture and comcool white dresses of their neighbors. But now | merce. These are not alarmists views. They that the negligee shirt has been received into popular favor and at the same time into good society, which is, perhaps, more important, slight inkling of what we may expect. this subject of heated debate no longer exists. The male clerk simply secures a negligee shirt, perhaps it only costs 50 cents, but that does not or climatic changes? Can man control the ele-

matter. He wears no vest or suspenders, and it ments on a scale of magnitude equal to the ocis a matter of indifference whether he wears a casion? Our answer is an affirmative one, and light office coat or not. There is a great deal of difference between shirt sleeves made of white the scale in operation today, but on one comnel or cheviot. What that difference is would perhaps be difficult to explain, but the fact rebending over their desks looking cool and com-fortable and no one asks them whether they glare at them until they feel obliged to get up and pull on their coats. The negligee shirt has lived a vexed question of daily department life and now if some equally happy method could be devised of securing a temperature in the public offices that will exactly suit every growth is largely of trees so much the better, clerk, then department life will perhaps be as happy as it is possible in this every-day world.

Outside of business circles the negligee shirt | sterile. The water that would have run quickly occupies a first rank, especially among the decorative articles of men's apparel. There

variety of design in these shirts. There is flannel and cheviot and good deal and looks very pretty. Neckties, of course, harmonize in color with the shirt and both may be quite gorgeous. The sash is an indispensable feature of the outfit and is of all colors of the rainbow.

costume of this kind, with white flannel trousers or of some light material, low russet shoes and a straight-brimmed straw hat, enables a man TENNIS.

to assume a position in society where the girls will be glad of the honor of his acquaintance.

A seashore dude with a good supply of negligee shirts and several patterns of trousers, with the latter article being threatened of late to the shirts and several patterns of trousers, with the shipped to America with the latter article being threatened of late to the shipped to America with the latter article being threatened of late to the shipped to America with the latter article being threatened of late to the shipped to America with the latter article being threatened of late to the shipped to America with the latter article being threatened of late to the shipped to America with the latter article being threatened of late to the shipped to a second the

neckties galore and russet shoes, will be able to be shipped to America with the idea of dress with as much variety as a girl, and if being able to undersell the southern that is not as lefty an ideal as a dude can have there is nothing in this world that is worth his while living for. The various articles which make up this costume have a certain importance derived from their money value.

A shirt, especially a silk one, may cost \$10 or \$12 and then \$8 must be sacrificed for a sash, maize and cotton, so that Judah and his brethflannel or serge, the russet shoes and hat. A dozen or so suits of this character represents a good deal of money and oneth the results of the character represents a good deal of money and oneth the results a good deal of money and oneth th good deal of money and ought, therefore, to command the respect which is due to wealth. A young man arrayed in one of those taking suits can afford to smoke five cent cigars and be indifferent to the proximity of a soda water fountain or an ice cream saloon. His appearance is sufficient for all social purposes, and clad in the garments of wealth he is not expected to give any further evidence of the untold means evidently at his command. When an oldfashioned person thinks about it for a moment he would be amazed that a man without a vest should be able to hold a position in fashionable circles, but such is the fact, and what was bad form some years ago is now good form, and thus it will be perceived how the world is turning topsy turvey. One of the claims of the negligee shirt to prominence is that it has been mainly instrumental in bringing about this revolution in dress, so that shirt sleeves which were once so vulgar now occupy a recognized position in society. It is often claimed that men are exsecrety. It is often claimed that men are exteremely conservative in making changes in the style of their dress. So they are. It has taken several years for the negligee shirt to acquire even recognition, and after that was secured there were additional years before this article of apparel was taken into general favor. Now that it is actually received into good society it is likely to remain for some time, so that there need to be no anxiety on the part of those who have laid in a large stock that it will be left on their hands next season as unavailable supplies. That is, unless a great change is brought about in the kind of weather which prevails in this locality during the summer season. As long as there is hot weather it seems probable that negligee shirts will continue to be worn. When the world takes another turn something class will probably be on top, but what its a question. It may be that the trousers are to go next and that men will drape their extremities in the fashion of the ancient Greeks of the first of the council and minister of the interior, is greatly may be a day.

There came a token from the west—A bunch to pampas grass—A bunch of pampas grass—A bunch of pampas grass—A simple bunch of waving grass.

So misty-soft and white,

I presend my cheek against its plumos

And felt my heart grow light.

And now I watch the creamy sprays,

And every night I say

"I know that he is coming

And is nearer by a day."

I say it with a happy trust,

For he will come, I know,

Who rode away in the sliver light of the world takes another turn something class will probably be on top, but what is a question. It may be that the rousers are to go next and that men will drape their extremities in the fashion of the ancient Greeks are perhaps the Chinese.

HYGEICH.

A SBURY PARK, N. J.

For he will off pampas grass—So minder the summer as a day in inching the summer as a great change is a presence of foreign and incipation, on the coast; of the summer season. As long the part of the world takes another turn someti tremely conservative in making changes in the
